## Horizontal Well Permitting

• Please fill in the following information to create a new W1.

**General Information**

(please hit save to see errors on this page)

**\*Purpose of Filing** ☐ New Drill ☐ Recompletion ☐ Reclass ☐ Field Transfer ☐ Reenter

**Expedite** ☐

**\*Wellbore Profiles** ☐ Vertical ☐ Horizontal ☐ Directional ☐ Sidetrack

**Horizontal Wellbore Type (for Horizontal Wellbore Profiles only)** ☐ PSA ☐ Allocation ☐ Stacked Lateral **Status Number (for Stacked Lateral only)**

**\*W-1 Defaults** Lease name:  Well number:

**\*Total Vertical Depth:**

"Do you **have** the right to develop minerals under any right-of-way? ☐ Yes ☐ No

"Is this well subject to **SWR 36** (hydrogen sulfide area)? **SWR 36** will automatically be determined by the system according to Field List entries provided.

**County:**

For a new drill or amended application, enter GPS coordinates for surface location in one of the following formats: 1) degrees, minutes, seconds; 2) decimal degrees; or 3) state plane.  
For decimal degrees, enter coordinates in the Degrees boxes.

After saving the data on this page, click the Display Coordinates button to view the coordinates on the GIS. If necessary, the data entered coordinates will be converted to decimal degrees, the RRC standard format. The decimal degrees coordinates will display as a hyperlink. Click the hyperlink to view the surface location on the GIS. **Important:** If you make any changes to the coordinates after viewing them on the GIS, be sure to save the record, and then click Display Coordinates again to view the updated location.

#### **RAILROAD COMMISSION OF TEXAS HEARINGS DIVISION**

**CONSOLIDATED OIL AND GAS  
DOCKET NOS. 7C-0291169 &  
7C-0291171**

**IN THE SPRABERRY (TREND AREA)  
FIELD, VARIOUS COUNTIES, TEXAS**

#### **FINAL ORDER AMENDING FIELD RULES FOR THE THE SPRABERRY (TREND AREA) FIELD VARIOUS COUNTIES, TEXAS**

The Commission finds that after statutory notice in the above-numbered docket heard on November 3, 2014, the presiding examiners have made and filed a report and recommendation containing findings of fact and conclusions of law, for which service was not required; that the proposed application is in compliance with all statutory requirements; and that this proceeding was duly submitted to the Railroad Commission of Texas at conference held in its offices in Austin, Texas.

The Commission, after review and due consideration of the examiners' report and

## Horizontal Well Permitting

### Field Rule discussion

Therefore, it is ORDERED by the Railroad Commission of Texas that the Field Rules for the Spraberry (Trend Area) Field in various counties, Texas, established on December 22, 1952, in Oil & Gas Docket Nos. 125 and 126, 7 & 8-25,841, are hereby amended. These field rules shall apply equally and independently to the following Field ID Numbers:

Spraberry (Trend Area) Field - District 7C - Field ID. No. 85279200  
Spraberry (Trend Area) Field - District 8 - Field ID. No. 85280300  
Spraberry (Trend Area) R 40 EXC Field - District 7C - Field ID. No. 85279201  
Spraberry (Trend Area) R 40 EXC Field - District 8 - Field ID. No. 85280301

The amended field rules are hereby set out in their entirety as follows:

**RULE 1:** The entire correlative interval from 6,865 feet to 10,605 feet as shown on the log of the Pioneer Natural Res. USA, Inc. Houtp Lease, Well No. 1 (API No. 42-329-31029), Section 24, Block 39, T-2-S, T&P RR Co. Survey, Midland County, Texas, shall be designated as a single reservoir for proration purposes and be designated as the Spraberry (Trend Area) Field. This interval is intended to include all reservoirs between the top of the Clearfork and the top of the Strawn Formations.

# Spraberry Trend and Permian Basin Forum

## Horizontal Well Permitting

### Field rule discussion- Lease spacing

In applying this rule, the general order of the Commission with relation to the subdivision of property shall be observed.

Provided, however, that for purposes of spacing for horizontal drainhole wells, the following shall apply:

- a. A take point in a horizontal drainhole well is any point along a horizontal drainhole where oil and/or gas can be produced from the reservoir/field interval. The first take point may be at a different location than the penetration point and the last take point may be at a location different than the terminus point.
- b. No horizontal drainhole well for oil or gas shall hereafter be drilled such that the first and last take points are nearer than ONE HUNDRED (100) feet to any property line, lease line or subdivision line.
- c. For each horizontal drainhole well, the distance perpendicular to such horizontal drainhole from any take point to any point on any property line, lease line or subdivision line shall be a minimum of THREE HUNDRED THIRTY (330) feet.

For the purpose of assigning additional acreage to a horizontal drainhole well pursuant to Statewide Rule 86, the distance from the first take point to the last take point

# Horizontal Well Permitting

### Field rule discussion- plat requirements

For the purpose of assigning additional acreage to a horizontal drainhole well pursuant to Statewide Rule 86, the distance from the first take point to the last take point in the horizontal drainhole shall be used in such determination, in lieu of the distance from penetration point to terminus.

In addition to the penetration point and the terminus of the wellbore required to be identified on the drilling permit application (Form W-1H) and plat, the first and last take points must also be identified on the drilling permit application (Remarks Section) and plat. Operators shall file an as-drilled plat showing the path, penetration point, terminus and the first and last take points of all drainholes in horizontal wells, regardless of allocation

## Spraberry Trend and Permian Basin Forum

# Horizontal Well Permitting

### Field rule discussion- SWR 37 and NPZ's

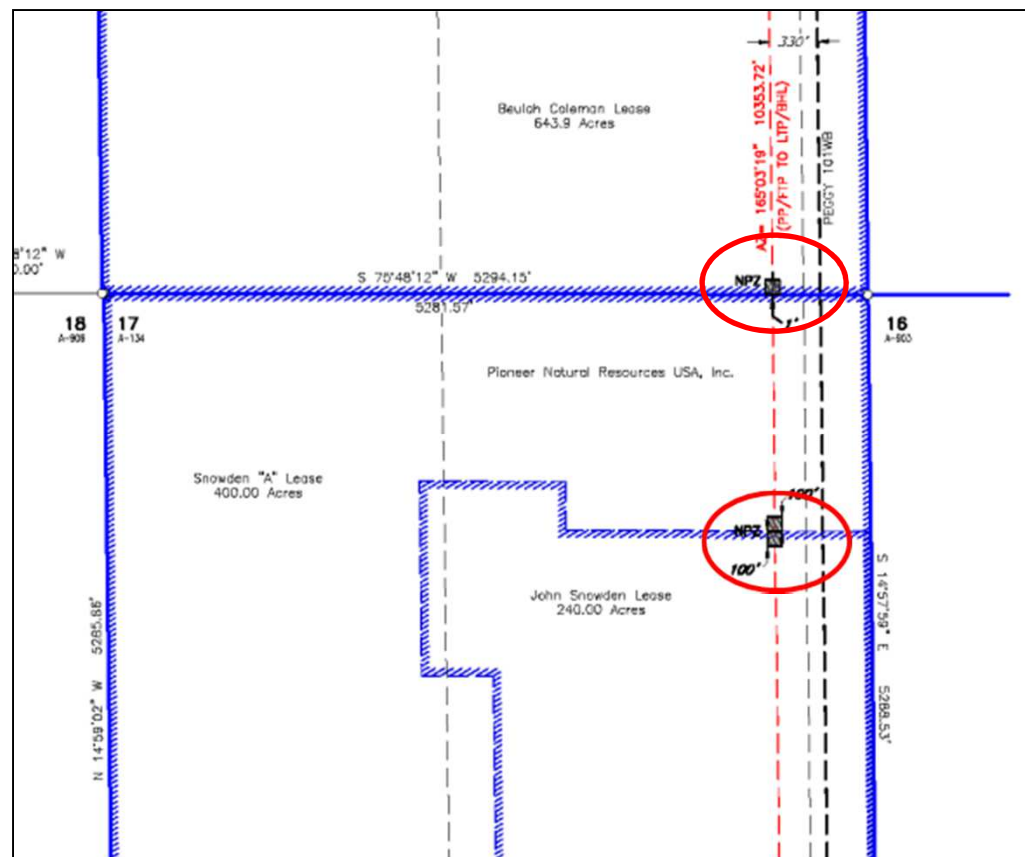

If the applicant has represented in the drilling application that there will be one or more no perf zones or “NPZs” (portions of the wellbore within the field interval without take points), then the as-drilled plat filed after completion of the well shall be certified by a person with knowledge of the facts pertinent to the application that the plat is accurately drawn to scale and correctly reflects all pertinent and required data. In addition to the standard required data, the certified plat shall include the as-drilled track of the wellbore, the location of each take point on the wellbore, the boundaries of any wholly or partially unleased tracts within a Rule 37 distance of the wellbore, and notations of the shortest distance from each wholly or partially unleased tract within a Rule 37 distance of the wellbore to the nearest take point on the wellbore.

## Horizontal Well Permitting

Field rule discussion- SWR 37 and NPZ's

## Spraberry Trend and Permian Basin Forum

# Horizontal Well Permitting

### Field rule discussion- as-drilled location compliance check

A properly permitted horizontal drainhole will be considered to be in compliance with the spacing rules set forth herein if the as-drilled location falls within a rectangle established as follows:

- a. Two sides of the rectangle are parallel to the permitted drainhole and 50 feet on either side of the drainhole;
- b. The other two sides of the rectangle are perpendicular to the sides described in (a) above, with one of those sides passing through the first take point and the other side passing through the last take point.

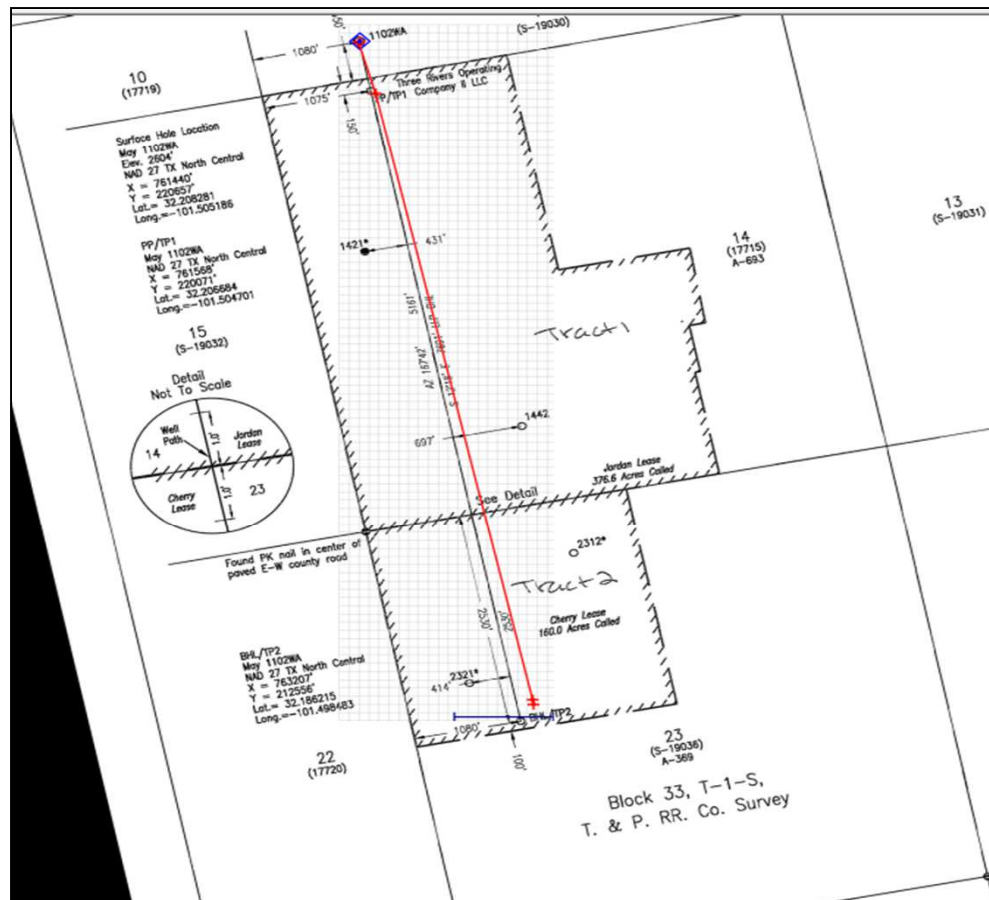

Any take point of a horizontal drainhole outside of the described rectangle must conform to the permitted distance to the nearest property line, lease line or subdivision line.

### Field rule discussion- off lease penetration point

For any well permitted in this field, the penetration point need not be located on the same lease, pooled unit or unitized tract on which the well is permitted and may be located on an Offsite Tract. When the penetration point is located on such Offsite Tract, the applicant for such a drilling permit must give 21 days notice by certified mail, return receipt requested to the mineral owners of the Offsite Tract. For the purposes of this rule, the mineral owners of the Offsite Tract are (1) the designated operator; (2) all lessees of record for the Offsite Tract where there is no designated operator; and (3) all owners of unleased mineral interests where there is no designated operator or lessee. In providing such notice, applicant must provide the mineral owners of the Offsite Tract with a plat clearly depicting the projected path of the entire wellbore. In the event the applicant is unable, after due diligence, to locate the whereabouts of any person to whom notice is required by this rule, the applicant must publish notice of this application pursuant to the Commission's Rules of Practice and Procedure. If any mineral owner of the Offsite Tract objects to the location of the penetration point, the applicant may request a hearing to demonstrate the necessity of the location of the penetration point of the well to prevent waste or to protect correlative rights. Notice of Offsite Tract penetration is not required if (a) written waivers of objection are received from all mineral owners of the Offsite Tract; or, (b) the applicant

## Spraberry Trend and Permian Basin Forum

# Horizontal Well Permitting

## Field rule discussion- SWR 38 notification

Under the following conditions, an operator, at its option, shall be granted an exception to Statewide Rule 38 and permitted to form fractional units of less than EIGHTY (80) acres, but not less than TWENTY (20) acres:

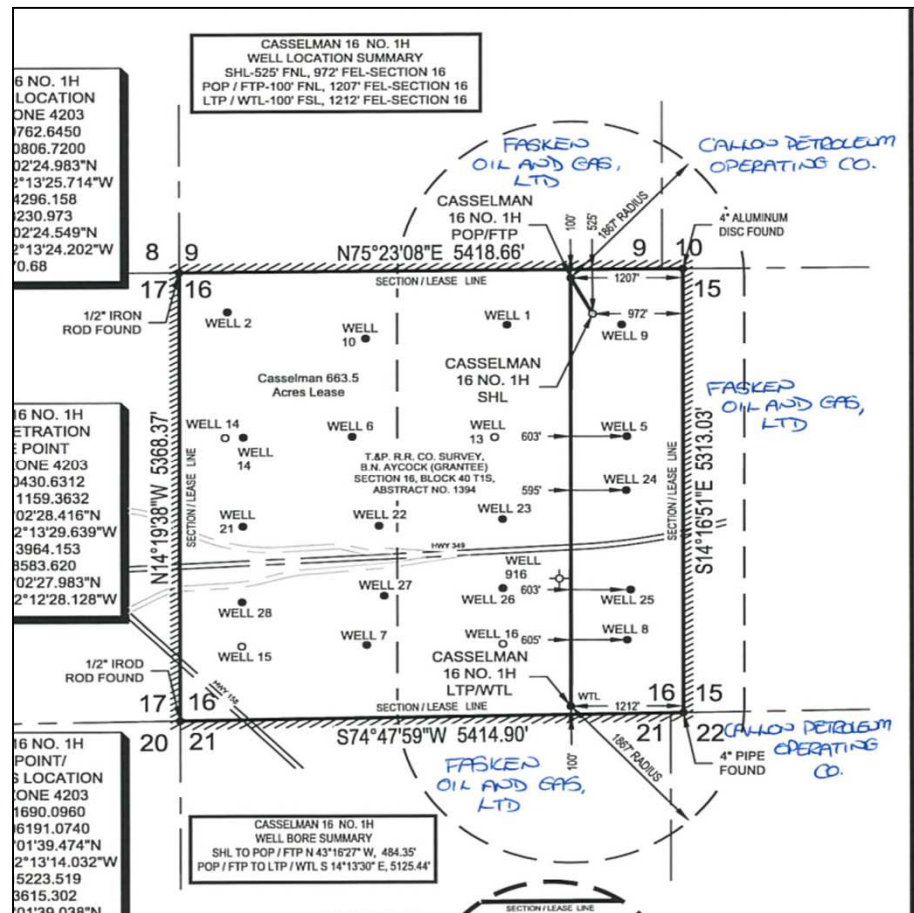

- a. The Railroad Commission shall notify in writing the designated operators, lessees of record for tracts that have no designated operator, and all owners of unleased mineral interests (i) within SIX HUNDRED SIXTY (660) feet from the location of a vertical well or (ii) within SIX HUNDRED SIXTY (660) feet of any point on a horizontal well within the correlative interval.
- b. Designated operators, lessees of record for tracts that have no designated operator, and all owners of unleased mineral interests receiving this written notification shall have 21 days from the date of issuance of the notice of application for a Rule 38 density exception to file a written protest with the Railroad Commission, such protest to be received by the Railroad Commission within said 21 day period.

### Field rule discussion- SWR 38 notification

## Spraberry Trend and Permian Basin Forum

# Horizontal Well Permitting

## Field rule discussion- depth severances

Where the ownership of oil and gas within the designated interval for Spraberry (Trend Area) Field has been divided horizontally, operators shall have the right to develop the individual ownership as follows:

- g. Operators of tracts with no horizontal severance of ownership within the designated interval for the Spraberry (Trend Area) Field AND operators of the shallow rights above a horizontal severance of ownership within that same interval shall permit wells in District 8 under Field ID. Number 85280300 and in District 7C under Field ID. Number 85279200.
- h. Operators with ownership of deep rights below a horizontal severance within the designated interval for the Spraberry (Trend Area) Field shall permit wells in District 8 under Field ID. Number 85280301 and in District 7C under Field ID. Number 85279201. These two field numbers for the Spraberry (Trend Area) Field shall be labeled "Spraberry (Trend Area) R 40 Exc" in the Commission's records.

## Spraberry Trend and Permian Basin Forum

# Horizontal Well Permitting

### Field rule discussion- depth severances

- i. Any operator using the Field ID. Numbers for "deep rights" certifies, by use of that number, that the ownership of the oil and gas rights is divided horizontally on the tract for which the drilling permit is sought. Operators using the Field ID Numbers for "deep rights" shall designate, in the Remarks Section of the W-1 and in the Remarks Section of the Completion Form, the depth or stratigraphic location of the horizontal severance.
- j. Where the ownership of oil and gas is horizontally divided, the Field Rules for the Spraberry (Trend Area) Field will apply separately to wells drilled under the shallow Field Number and wells drilled under the deep Field Number, such that proration units on a tract above and below the horizontal division of ownership are independent and may overlap.

### Field rule discussion- stacked laterals

**RULE 6:** For oil and gas wells, Stacked Lateral Wells within the correlative interval for the field that are drilled from different wellbores may be considered a single well for regulatory purposes, as provided below:

1. A horizontal drainhole well qualifies as a Stacked Lateral Well under the following conditions:
  - a. There are two or more horizontal drainhole wells on the same lease or pooled unit within the correlative interval for the field;
  - b. Horizontal drainholes are drilled from different surface locations;
  - c. All take points of a Stacked Lateral Well's horizontal drainholes shall be within a rectangular area the width of which is SIX HUNDRED SIXTY (660) feet, and the length of which is the distance from the two most distant take points; and
  - d. There shall be no maximum or minimum distance limitations between horizontal drainholes of a Stacked Lateral Well in a vertical direction.

## Spraberry Trend and Permian Basin Forum

## Field rule discussion- stacked laterals

When this type of spacing requirement is in place then plat must show box around all wells in stacked lateral

## Spraberry Trend and Permian Basin Forum

---

# Horizontal Well Permitting

## Field rule discussion- stacked laterals

2. A Stacked Lateral Well, including all surface locations and horizontal drainholes comprising such Stacked Lateral Well, shall be considered as a single well for density and allowable purposes.
  - a. The requirements of Statewide Rule 86(d)(4) shall not apply to stacked lateral wells.
  - b. For the purpose of assigning additional acreage to the Stacked Lateral Well pursuant to Rule 86, the horizontal drainhole displacement shall be calculated based on the distance from the first take point to the last take point in the horizontal drainhole for the Record Well, regardless of the horizontal drainhole displacement of other horizontal drainholes of the Stacked Lateral Well.

## Spraberry Trend and Permian Basin Forum

# Horizontal Well Permitting

## Field rule discussion- stacked laterals

3. Each surface location of a Stacked Lateral Well must be permitted separately and assigned an API number. In permitting a Stacked Lateral Well, the operator shall identify each surface location of such well with the designation "SL" in the well's lease name and also describe the well as a Stacked Lateral Well in the "Remarks" of the Form W-1 drilling permit application. The operator shall also identify on the plat any other existing, or applied for, horizontal drainholes comprising the Stacked Lateral Well being permitted.
4. To be a regular location, each horizontal drainhole of a Stacked Lateral Well must comply with (i) the field's minimum spacing distance as to any lease, pooled unit or property line, and (ii) the field's minimum between well spacing distance as to any different well, including all horizontal drainholes of any other Stacked Lateral Well, on the same lease or pooled unit in the field. Operators may seek exceptions to Rules 37 and 38 for Stacked Lateral Wells in accordance with the Commission's rules, or any applicable rule for this field.

5. Operators shall file separate completion forms for each surface location of the Stacked Lateral Well. Operators shall also file a certified as-drilled location plat for each surface location of a Stacked Lateral Well showing each horizontal drainhole from that surface location, confirming the well's qualification as a Stacked Lateral Well and showing the maximum distances in a horizontal direction between each horizontal drainhole of the Stacked Lateral Well.

## Spraberry Trend and Permian Basin Forum

### Spraberry Trend development questions:

- Can you form a pooled unit for horizontal well development utilizing tracts where there is already established vertical lease production?
- Can I drill a Allocation or PSA well as a Stacked Lateral?

## Spraberry Trend and Permian Basin Forum

### Spraberry Trend development questions:

- Who do I need to notify for an off-lease penetration point if I am filing in the R40 (EXC) field?
- What happens if I am developing horizontal wells where a depth severance exists and there are vertical wells from the shallower lease with perforations below the severance depth?
